

Ste-Julie 1 June 2020

MANUFACTURER'S DECLARATION

As stipulated in the "PROTOCOLE NATIONAL DE DÉCONFINEMENT" for companies reopening and to ensure the health and safety of employees as published by the French Ministry of Labor dated May 9, 2020 (ref. Page 18) :

"To clean surfaces, it will be necessary to use products containing a surfactant (lipid solubilizer) present in soaps, degreasers, detergents and stain removers. In addition to its degreasing actions on surfaces, the surfactant will also degrade the lipids of the envelope of the SARS-CoV-2 virus and thus inactivate it. These cleaning products can therefore be used for the daily maintenance of the premises after the return of staff. "

I, the undersigned, Ali Kademi, Director of Quality Assurance, Regulation and Compliance, InnuScience Group Inc., declare that the following InnuScience products :

- Nu-Action 3
- Nu-Bio Scrub
- Nu-Kleen Smell (Nu-Multi Kleen)
- Nu-Kleen Floor
- Nu-Kleen All Food Safe
- Nu-Kleen All
- Nu-Karpet Kare
- Nu-Life
- Nu-Pro Kleen
- Nu-Power Kleen
- Nu-Fuzion
- Nu-Grip Plus
- Nu Cycle N

Contain surfactants (lipids solubilizers) that in accordance with the communication from the French Ministry of Labor, have the capacity to inactivate the SARS-CoV-2 virus and therefore to permanently remove its infectious character.

These products are not disinfectants and do not require registration. InnuScience only confirms that they are suitable for daily cleaning of surfaces in the context of return to work and as recommended by the French Ministry of Labor.

Ali Kademi, Ph.D.
Directeur Assurance Qualité, Réglementation et Conformité
